

Digital designer

Job title: **Digital designer**

Company: **Axian Consulting Ltd.**

Location: **Home-based**

Last updated: **May 2023**

Opportunity

Axian is a technology and consultancy business, working with Pharmaceutical, Biotech and Medtech companies globally, with a particular focus on drug safety.

Our team is passionate about delivering innovative digital solutions to clients and as a company we embrace the challenge of bringing digital engagement tools to clinical practice and trials. This not only gives our clients valuable insights, but also assures safe use of pharmaceutical products and improves health outcomes for patients.

You will become part of a technically strong team that endeavours to work smarter. We are supportive of each other and committed to balancing purpose and profit. The ethos of the company mean that we consider the impact of decisions on our team members, clients, suppliers, community, and the environment.

Axian is an Equal Opportunities Employer, welcoming applications from all people, regardless of their race, sex, disability, age, religion, or sexual orientation.

Position summary

We are looking for a Digital designer to join our in-house Creative team. The role will suit an experienced and enthusiastic individual wanting to join a like-minded team and develop their skills in a creative healthcare-based environment. We are looking for someone interested in expanding our digital solutions (UX/UI) who also has a general range of other skills such as print or video/animation.

To apply, email mcassidy@axian.consulting stating the position title and enclosing your CV.

Key responsibilities

- Providing creative solutions as part of a client project team for the delivery of digital solutions using wireframing, UI design and prototypes
- General internal design support (Creative, Marketing, and Software engineering)
- Helping design and develop our own internal software solutions by providing creative and practical ideas as new features are added
- Keeping up-to-date with current design trends and technologies

Qualifications

Preferred experience includes:

- Ability to manage own workload and projects based on company needs
- Experience working with varied and distributed teams, including graphic designers and software engineers
- Comfortable engaging directly with both technical and non-technical employees/clients at all levels of the business

Requirements

- We are seeking someone with several years commercial experience
- Strong portfolio with examples of work
- Genuine enthusiasm for design with an excellent attention to detail
- Must have a questioning nature with an interest in all forms of digital solutions and behavioural design
- Competent in Adobe Creative Suite software
- Competent working in the Mac environment and Microsoft 365
- UK work authorisation is required
